

Want your cell cultures to live forever?

Let us immortalize them for you!

100% Guaranteed or You Don't Pay!

Outstanding Quality Control

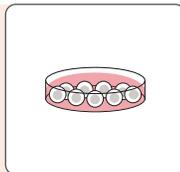

Great Turnaround Times

10+ years of experience

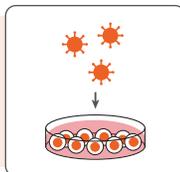

Simply submit your cells:

- Any cell type, species, or tissue!
- Or, take advantage of our 500+ ready-to-use immortalized cell lines collection derived from popular model species and tissues.

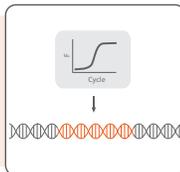

Cell immortalization and screening:

- Our cell culture experts will select from our wide range of immortalization reagents to find the perfect one for your project.

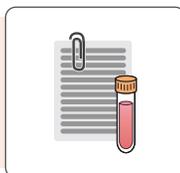

Stringent quality control:

- Morphology assessment
- qPCR analysis on transgene expression
- Microbial contaminant testing

Service Deliverables

- ✓ 2 million cells (up to 2 vials)
- ✓ No charge if project fails
- ✓ As little as 8-12 weeks turaround time

Why use immortalized cell lines?

- Retains most primary cell characteristics
- Long-term source of cells for your project
- Eliminates batch-to-batch variability
- Easier to maintain than primary cells

abm has always been very helpful with technical assistance in any of our questions and concerns. I also consider the price for the services provided as very competitive, as other companies charge a multiple of **abm's** price.
